TECHNICAL DATA SHEET

MANUFACTURED IN CANADA

H-300 CAR WASH

PRODUCT NUMBER: NA252

This is a quality white granular compound. It is a more alkaline product and as such is intended for washing and degreasing trucks, buses and cars. It is a fully biodegradable product and is safe on all car paint surfaces and car wash equipment. It is ideally suited for use with pressure wash equipment and may also be used for pressure cleaning of greasy parts, engines, etc. This product contains active detergents, water conditioners, emulsifiers, alkaline builders and rinsing agents for effective removal of dirt, oil and stubborn road film.

DIRECTIONS:

When used with pressure wash equipment use 2-3 grams per litre of water (1/3 – 1/2 oz/gallon). Best results are obtained by using hot water. Wet the entire surface to be cleaned with wash solution. Clean each section thoroughly. Rinse with cold water and allow to drain dry. When using a concentrate to be further diluted with water, add up to 30 grams of product per litre of hot water (5 oz/gal).
For degreasing of engines and parts, use 12-18 grams per litre of warm water (2-3 oz per gallon). Best results are obtained by using hot water. Rinse with warm water and allow to drain dry.
