NoviChem BY NoviClean

TECHNICAL DATA SHEET

MANUFACTURED IN CANADA

AUTOWASH 1 (ACID)

PRODUCT NUMBER: NB268

AUTOWASH 1 (Acid) is designed to be used in conjunction with an alkaline cleaner, AUTOWASH 2 (Alkali), in a two-phase vehicle wash system. AUTOWASH 1 will loosen road film and soil from the vehicle surface, and then AUTOWASH 2 will completely remove these soils and neutralize the acid cleaner to deter any corrosion that might otherwise occur.

DIRECTIONS:

The dilution of AUTOWASH 1 will depend on the equipment used, the pressure available, water conditions and temperature. On average, the recommended dilution is 1/2 to 1 oz per gallon (3 to 6 ml per litre).

When washing vehicles with a two-phase system, use AUTOWASH 2 immediately following the application of AUTOWASH 1. It should be applied in the same pattern as the AUTOWASH 1 to allow the cleaners to have equal contact time.
