

TECHNICAL DATA SHEET

LOW pH TOUCHLESS PRESOAK

PRODUCT NUMBER: NB356

This product is an unscented, heavy-duty, low pH presoak designed for use in a two-step process combined with a high pH presoak. Low pH Touchless Presoak is formulated to remove heavy road salts and dissolve road film. When used in conjunction with a high pH presoak, allow up to 30 seconds to dissolve soils.

DIRECTIONS:

This presoak is designed to be diluted at a ratio up to 1:160 with warm water. This product can be used directly before or after the high pH presoak.

FOR COMMERCIAL USE
