KEVLAR CERAMIC

PRODUCT NUMBER: NA291

Kevlar Ceramic is a professional-grade, highly concentrated sealant and high-speed drying agent engineered with integrated Ceramic Coating Technology. Designed to provide a durable layer of defence, this formula utilizes a ceramic-polymer matrix that chemically bonds to the vehicle's surface. This creates a durable, high-gloss sacrificial barrier that provides superior water repellency, enhanced UV protection, and a deep, mirror-like shine.

As a dual-action finishing treatment, Kevlar Ceramic acts as a potent drying aid, instantly breaking surface tension to facilitate rapid water shedding for a spot-free finish and quicker vehicle throughput.

DIRECTIONS:

This product may be pre-diluted as 1 part to 10 parts of water before final dilution and application. It may also be directly diluted by using automatic dispensing equipment with up to 600 parts of hot or cold water. Dilution ratios are dependent on desired final results.
